I.C.R.N.

The Inter College Radio Network is a joint activity of both Clarkson College and the State University College. One hundred-forty students from the two schools are involved in the day-to-day operations of Stations WNTC and WTSC AM-FM, the News Department, the Business and Secretarial Departments, and the Technical Staff.

WNTC is the "All Collegiate, Fab Fiftty Sound" on the two campuses, playing the most popular rock and roll music picked in an opinion poll of the students each week. WNTC is the student's constant radio companion, from "wake-up" service in the morning to the sharing of an "all-nighter" with "Infinity" coverage to the wee hours of the morning.

WTSC is the "Full Fidelity FM Voice" of the ICRN with programming for every taste and mood: Jazz, Folk, Broadway, Classical, and today's easy listening vocalists and instrumentalists. WTSC also broadcasts many special programs, including concerts from the Crane School of Music, college convocations, and Clarkson Hockey.

The News Department serves both stations with evening newscasts from the Lewis House News Center, and keeps the academic community informed and up to date on state-wide, nation-wide, and world-wide events from the wires of United Press International by posting bulletins on the Newsroom window.

The Technical Staff maintains all the equipment of the Network. Besides keeping Network facilities in perfect operating condition, the Staff designs and constructs much of the new equipment obtained by the ICRN, and constantly experiments with new methods of providing better coverage to the two campuses.
